

# S/4HANA PRE-ANALYSIS

2BM ERP

## START YOUR S/4HANA JOURNEY WITH A PRE-ANALYSIS

In 2014, SAP announced that the current ECC solution will only be supported until 2025. Therefore, many companies are already switching to S/4HANA.

The transition to S/4HANA is a unique opportunity to review and optimize the company's existing business processes so that they are adapted to the digital journey. Therefore, 2BM offers a structured S/4HANA pre-analysis, which ensures that you get to validate your combining processes and choose the optimal conversion strategy that suits the company's needs.

Thus, the prerequisite for a successful transition to S/4HANA is in place, so you can start with the actual conversion and get ready for 2025.

## BENEFITS

Overview of existing business processes and adaptation of processes to SAP Best Practice

Documentation of GAPs and weaknesses in the current system

A ready-to-run S/4HANA conversion strategy and roadmap for IT projects

## GET STARTED

Get started with your S/4HANA journey. If you want to start your S/4HANA pre-analysis, contact us at [s4hana@2bm.com](mailto:s4hana@2bm.com) or by phone +45 35 55 55 75.

## SOLUTION DESIGN VIA WORKSHOPS

The pre-analysis is a collaboration between the company's process owners and 2BM's experienced SAP consultants. We are based on the company's strategic focus on our workshops, where we will together analyze the current processes and identify technical and functional changes, so that your company gets the right basis for the transition to S/4HANA. On the basis of the analysis, a recommendation is prepared for the conversion strategy and roadmap.

## PRE-ANALYSIS CONTENT

- AS-IS description of current processes with identification of pain points
- TO-BE solution design optimized for the S/4HANA platform
- Technical Readiness Check
- Identification of conversion strategy - migration, re-implementation, cloud, on-premise
- Advanced IT-roadmap

## ABOUT 2BM
